

Industrial Mechanic (Millwright)

Guide to Course Content

Online: www.saskapprenticeship.ca

Recognition:

To promote transparency and consistency, this document has been adapted from the 2017 Industrial Mechanic (Millwright) Red Seal Occupational Standard (Employment and Social Development Canada).

Industrial Mechanic (Millwright) Red Seal Occupational Standard (RSOS), describing the “full scope” of the trade, can be found at www.red-seal.ca

STRUCTURE OF THE **GUIDE TO COURSE** **CONTENT**

To facilitate understanding of the occupation, this guide to course content contains the following sections:

Task Matrix: a chart which outlines graphically the major work activities, tasks and sub-tasks of this standard detailing the essential skills and the level of training where the content is covered. The Task Matrix is broken down into the following:

Major Work Activity: the largest division within the standard that is comprised of a distinct set of trade activities.

Task: distinct actions that describe the activities within a major work activity.

Sub-task: distinct actions that describe the activities within a task.

Training Profile Chart: a chart which outlines the model for Saskatchewan Apprenticeship and Trade Certification Commission (SATCC) technical training.

Technical Training Course Content for the Industrial Mechanic (Millwright) trade: a chart which outlines the model for SATCC technical training sequencing. For the harmonized level of training, a cross reference to the Harmonized apprenticeship technical training sequencing, at the learning outcome level, is provided.

TRAINING REQUIREMENTS FOR THE INDUSTRIAL MECHANIC (MILLWRIGHT) TRADE

To graduate from each level of the apprenticeship program, an apprentice must successfully complete the required technical training and compile enough on-the-job experience to total at least 1800 hours each year. Total trade time required is 7200 hours and at least 4 years in the trade.

There are four levels of technical training delivered by Saskatchewan Polytechnic in Saskatoon and Suncrest College in Esterhazy.

Level One:	8 weeks
Level Two:	8 weeks
Level Three:	8 weeks
Level Four:	8 weeks

The information contained in this document details the technical training delivered for each level of apprenticeship. An apprentice spends approximately 15% of their apprenticeship term in a technical training institute learning the technical and theoretical aspects of the trade. The hours and percentages of technical and practical training may vary according to class needs and progress.

The content of the technical training components is subject to change without notice.

Entrance Requirements for Apprenticeship Training

Your grade twelve transcripts (with no modified classes) or GED 12 is your guarantee that you meet the educational entrance requirements for apprenticeship in Saskatchewan. In fact, employers prefer and recommend apprentices who have completed high school. This ensures the individual has all of the necessary skills required to successfully complete the apprenticeship program and receive journeyman certification.

Individuals with “modified” or “general” classes in math or science do not meet our entry requirements. These individuals are required to take an entrance assessment prescribed by the SATCC.

English is the language of instruction in all apprenticeship programs and is the common language for business in Saskatchewan. Before admission, all apprentices and/or “upgraders” must be able to understand and communicate in the English language.

Designated Trade Name	Math Credit at the Indicated Grade Level ^❶	Science Credit at Grade Level
Industrial Mechanic (Millwright)	Grade 11	Grade 10
❶ - (One of the following) WA – Workplace and Apprenticeship; or F – Foundations; or P – Pre-calculus, or a Math at the indicated grade level (Modified and General Math credits are not acceptable.). *Applicants who have graduated in advance of 2015-2016, or who do not have access to the revised Science curricula will require a Science at the minimum grade level indicated by trade. For information about high school curriculum, including Math and Science course names, please see: http://www.curriculum.gov.sk.ca Individuals not meeting the entrance requirements will be subject to an assessment and any required training		

INDUSTRIAL MECHANIC (MILLWRIGHT)

TASK MATRIX CHART

This chart outlines the major work activities, tasks and sub-tasks from the 2017 Industrial Mechanic (Millwright) Red Seal Occupational Standard. Each sub-task details the corresponding essential skill and level of training where the content is covered. *

* Sub-tasks with numbers in the boxes is where the content will be delivered in training.

A – Performs Common Occupational Skills

A-1 Performs safety-related functions	1.01 Uses personal protective equipment (PPE) and safety equipment 1, 2, 3, 4	1.02 Maintains safe worksite 1 (2, 3, 4 In Context)	1.03 Protects the environment 1 (2, 3, 4 In Context)	1.04 Performs lock-out/tag-out and zero-energy state procedures 1, 2, 3, 4
A-2 Uses tools and equipment	2.01 Uses hand and portable power tools 1 (2, 3, 4 In Context)	2.02 Uses shop machines 1 (2, 3, 4 In Context)	2.03 Uses access equipment 1 (2, 3, 4 In Context)	
A-3 Performs routine trade tasks	3.01 Plans work 1 (2, 3, 4 In Context)	3.02 Fabricates work piece 1, 2, 3, 4	3.03 Lubricates systems and components 1, 2, 3, 4	3.04 Performs leveling of components and systems 1, 2, 3, 4
	3.05 Uses fastening and retaining devices 1 (2, 3, 4 In Context)			
	3.06 Performs material identification 1, 2 (3, 4 In Context)	3.07 Performs heat treatment of metal 1, 2 (3, 4 In Context)	3.08 Uses mechanical drawings and schematics 1 (2, 3, 4 In Context)	
A-4 Uses communication and mentoring techniques	4.01 Uses communication techniques 1	4.02 Uses mentoring techniques 4		

A-5 Performs measuring and layout	5.01 Prepares work area, tools and materials 1	5.02 Measures material and components 1	5.03 Lays out components 1	5.04 Maintains precision measuring and layout tools 1	
A-6 Performs cutting and welding operations	6.01 Cuts material with oxy-fuel and plasma arc equipment 1	6.02 Joins material using oxy-fuel welding equipment 1	6.03 Welds material using shielded metal arc welding (SMAW) equipment 2	6.04 Welds material with gas metal arc welding (GMAW) equipment 2	6.05 Welds material with gas tungsten arc welding (GTAW) equipment (NOT COMMON CORE) * 2
	6.06 Maintains welding equipment 1				

**Subtask 6.05 is not consistently performed by IMMs across Canada; therefore, this content is deemed not common core and will not be assessed on the IMM certification examination.*

B – Performs Rigging, Hoisting/Lifting and Moving

B-7 Plans rigging, hoisting/lifting and moving	7.01 Determines load 1	7.02 Selects rigging equipment 1	7.03 Selects hoisting/lifting and moving equipment 1	7.04 Secures area 1
B-8 Rigs, hoists/lifts and moves load	8.01 Sets up rigging, hoisting/lifting and moving equipment 1	8.02 Performs hoist/lift and move 1	8.03 Maintains rigging, hoisting/lifting and moving equipment 1	

C – Services Mechanical Power Transmission Components and Systems

C-9 Services prime movers	9.01 Installs prime movers 4	9.02 Diagnoses prime movers 4	9.03 Maintains prime movers 4	9.04 Repairs prime movers 4
C-10 Services shafts, bearings and seals	10.01 Installs shafts, bearings and seals 2	10.02 Diagnoses shafts, bearings and seals 2	10.03 Maintains shafts, bearings and seals 2	10.04 Repairs shafts, bearings and seals 2
C-11 Services couplings, clutches and brakes	11.01 Installs couplings, clutches and brakes 2	11.02 Diagnoses couplings, clutches and brakes 2	11.03 Maintains couplings, clutches and brakes 2	11.04 Repairs couplings, clutches and brakes 2
C-12 Services chain and belt drive systems	12.01 Installs chain and belt drive systems 2	12.02 Diagnoses chain and belt drive systems 2	12.03 Maintains chains and belt drive systems 2	12.04 Repairs chains and belt drive systems 2
C-13 Services gear systems	13.01 Installs gear systems 2	13.02 Diagnoses gear systems 2	13.03 Maintains gear systems 2	13.04 Repairs gear systems 2
C-14 Performs shaft alignment procedures	14.01 Performs rough alignment 2	14.02 Performs dial alignment 2, 3	14.03 Performs laser alignment 3	

D – Services Material Handling/Process Systems

D-15 Services robotics and automated equipment	15.01 Installs robotics and automated equipment 4	15.02 Diagnoses robotics and automated equipment 4	15.03 Maintains robotics and automated equipment 4	15.04 Repairs robotics and automated equipment 4	
D-16 Services fans and blowers	16.01 Installs fans and blowers 3	16.02 Diagnoses fans and blowers 3	16.03 Maintains fans and blowers 3	16.04 Repairs fans and blowers 3	
D-17 Services pumps	17.01 Installs pumps 3	17.02 Diagnoses pumps 3	17.03 Maintains pumps 3	17.04 Repairs pumps 3	
D-18 Services compressors	18.01 Installs compressors 3	18.02 Diagnoses compressors 3	18.03 Maintains compressors 3	18.04 Repairs compressors 3	
D-19 Services process piping, tanks and containers	19.01 Installs process tanks and containers 3	19.02 Installs process piping 3	19.03 Diagnoses process tanks and containers 3	19.04 Diagnoses process piping 3	19.05 Maintains process tanks and containers 3
	D-19.06 Maintains process piping 3	D-19.07 Repairs process tanks and containers 3	D-19.08 Repairs process piping 3		
D-20 Services conveying systems	20.01 Installs conveying systems 4	20.02 Diagnoses conveying systems 4	20.03 Maintains conveying systems 4	20.04 Repairs conveying systems 4	

E-21 Services hydraulic systems	21.01 Installs hydraulic systems 3	21.02 Diagnoses hydraulic systems 3	21.03 Maintains hydraulic systems 3	21.04 Repairs hydraulic systems 3
E-22 Services pneumatic and vacuum systems	22.01 Installs pneumatic and vacuum systems 3	22.02 Diagnoses pneumatic and vacuum systems 3	22.03 Maintains pneumatic and vacuum systems 3	22.04 Repairs pneumatic and vacuum systems 3

F-23 Performs preventative and predictive maintenance	23.01 Performs preventative maintenance activities 4	23.02 Performs vibration analysis procedures 4	23.03 Performs balancing procedures 4	23.04 Performs non-destructive testing (NDT) procedures 4	23.05 Performs fluid analysis procedures 4
	23.06 Performs predictive maintenance activities 4				
F-24 Commissions and decommissions equipment	24.01 Commissions systems and components 4	24.02 Decommissions systems and components 4			

TRAINING PROFILE CHART

This Training Profile Chart represents Saskatchewan Apprenticeship and Trade Certification Commission (SATCC) technical training at the topic level.

Level One (Harmonized)	Transcript Code	Hours
Layout & Hand Cut Tools	TOOL 110 - Theory	11
	TOOL 111 - Shop	15
Drills & Abrasives	TOOL 152 - Theory	11
	TOOL 153 - Shop	15
Metallurgy	METL 102 - Theory	15
	METL 103 - Shop	11
Precision Measuring; Assembly Tools; Fasteners; Threading	MEAS 102 - Theory	22
	MEAS 103 - Shop	30
Thermal Cutting, Oxy-Fuel and Arc Welding	WLDR 104 - Theory	10
	WLDR 105 - Shop	16
Rigging, Hoisting, and Lifting	RIGG 101 - Theory	15
	RIGG 102 - Shop	11
Safety & Communication	SAFE 100 - Theory	13
	SAFE 101 - Shop	13
Technical Drawing	PRNT 102	16
Trade Mathematics	MATH 108	16
		240

Level Two (Harmonized)	Transcript Code	Hours
Shafts, Keys, Seals, Bearing and Plain Bearings	TRNM 208 - Theory	26
	TRNM 209 - Shop	26
Lubrication & Levelling	MCHN 200 - Theory	13
	MCHN 201 - Shop	13
Arc Welding	WLDR 200 - Theory	26
	WLDR 201 - Shop	26
Belts and Chains	INDM 206 - Theory	13
	INDM 207 - Shop	13
Gear Systems, Couplings, Clutches, & Brakes	BRAK 208 - Theory	13
	BRAK 209 - Shop	13
Rough Alignment and Dial Alignment	ALGN 200 - Theory	13
	ALGN 201 - Shop	13
Technical Drawing	PRNT 203	16
Trade Mathematics	MATH 201	16
		240

Level Three (Harmonized)	Transcript Code	Hours
Advanced Shaft Alignment	ALGN 300 - Theory	13
	ALGN 301 - Shop	13
Pipe Fitting, Tanks and Containers	PIPE 300 - Theory	13
	PIPE 301 - Shop	13
Pneumatics, Compressors, Vacuum Systems, Fans and Blowers	PNEU 300 - Theory	26
	PNEU 301 - Shop	26
Pumps	PUMP 300 - Theory	26
	PUMP 301 - Shop	26
Hydraulics	HYDR 302 - Theory	26
	HYDR 303 - Shop	26
Technical Drawing	PRNT 302	16
Trade Mathematics	MATH 300	16
		240

Level Four (Harmonized)	Transcript Code	Hours
Robotics and Automated Equipment	ROBT 400 - Theory	13
	ROBT 401 - Shop	13
Machine Installation	MCHN 400 - Theory	13
	MCHN 401 - Shop	13
Material Handling	MATE 400 - Theory	13
	MATE 401 - Shop	13
Mentoring Techniques, Commissioning & Decommissioning Equipment	MENT 402 - Theory	13
	MENT 403 - Shop	13
Machine Tool	MACH 400 - Theory	26
	MACH 401 - Shop	26
Steam/Prime/Preventative Maintenance	MAIN 400 - Theory	26
	MAIN 401 - Shop	26
Introduction to CAD	PRNT 405	16
Trade Mathematics	MATH 400	16
		240

Exceed Topics

Throughout this guide to course content there are topics, which exceed the scope of work set out by the Industrial Mechanic (Millwright) RSOS. Industry in Saskatchewan has deemed certain topics to fall within the scope of work of the Industrial Mechanic (Millwright) trade and therefore require technical training to also cover these topics.

TECHNICAL TRAINING COURSE CONTENT

This chart outlines the model for Saskatchewan Apprenticeship and Trade Certification Commission (SATCC) technical training sequencing. For the harmonized level of training, a cross reference to the Red Seal Occupational Standard (RSOS) apprenticeship technical training sequencing, at the learning outcome level, is provided.

Sub-tasks listed are the minimum to be covered in a topic. Related sub-tasks not listed may be used as a reference and taught “in context” in other topics.

Level One	8 weeks	240 hours
Layout & Hand Cut Tools – Theory		11 hours
- describe types of hand cutting tools - describe use of hand cutting tools - describe use for layout tools		
Layout & Hand Cut Tools – Shop		15 hours
- construct projects with hand cutting tools - maintain hand cutting tools - construct projects with the use of layout tools		
RSOS topics covered in this section of training:		
A-2 Uses tools and equipment		
A-2.01 Uses hand and portable power tools		
A-3 Performs routine trade tasks		
A-3.01 Plans work		
A-3.02 Fabricates workpiece		
Drills & Abrasives – Theory		11 hours
- identify types of power tools - describe use of power tools		
Drills & Abrasives – Shop		15 hours
- construct projects with power tools - maintain power tools		
RSOS topics covered in this section of training:		
A-2 Uses tools and equipment		
A-2.01 Uses hand and portable power tools		
A-2.02 Uses shop machines		
Metallurgy – Theory		15 hours
- describe metallurgy of ferrous and non-ferrous metals - identify steel manufacturing - identify soldering methods - identify destructive and non-destructive testing methods		

Metallurgy – Shop

11 Hours

- construct tools made from steel
- identify types of ferrous and non-ferrous metals
- perform destructive and non-destructive testing methods
- perform soldering methods

RSOS topics covered in this section of training:

A-2 Uses tools and equipment

A-2.01 Uses hand and portable power tools

A-2.02 Uses shop machines

A-3 Performs routine trade tasks

A-3.01 Plans work

A-3.02 Fabricates workpiece

A-3.06 Performs material identification

A-3.07 Performs heat treatment of metal

Precision Measuring; Assembly Tools; Fasteners; Threading – Theory

22 hours

- identify precision measuring tools
- describe uses of precision measuring tools
- identify hand threading tools
- describe use of hand threading tools
- identify types of fasteners
- identify assembly tools

Precision Measuring; Assembly Tools; Fasteners; Threading – Shop

30 hours

- operate precision measuring tools
- maintain precision measuring tools
- operate hand threading tools

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.02 Fabricates work piece

A-3.04 Performs leveling of components and systems

A-3.05 Uses fastening and retaining devices

A-5 Performs measuring and layout

A-5.01 Prepares work area, tools and materials

A-5.02 Measures material and components

A-5.03 Lays out components

A-5.04 Maintains precision measuring and layout tools

Thermal Cutting, Oxy-Fuel and Arc Welding – Theory

10 hours

- describe the safe operation, assembly and maintenance of OFC, OFW, PAC, and TB
- identify safe operation, assembly and maintenance of GMAW and GTAW
- describe the safe operation of fabrication equipment

Thermal Cutting, Oxy-Fuel and Arc Welding – Shop

16 hours

- demonstrate the safe operation, assembly and maintenance during OFC and PAC
- demonstrate the safe operation, assembly and maintenance while OFW and TB
- demonstrate the safe operation, assembly and maintenance when utilizing fabrication equipment

RSOS topics covered in this section of training:

A-6 Performs cutting and welding operations

A-6.01 Cuts material with oxy-fuel and plasma arc equipment

A-6.02 Joins material using oxy-fuel welding equipment

A-6.06 Maintains welding equipment

Rigging, Hoisting, and Lifting

15 hours

- identify rigging equipment
- describe rigging techniques
- interpret OH&S regulations

Rigging, Hoisting, and Lifting

11 hours

- apply rigging techniques
- maintain rigging equipment
- calculate load estimation

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.03 Lubricates systems and components

B-7 Plans rigging, hoisting/lifting and moving

B-7.01 Determines load

B-7.02 Selects rigging equipment

B-7.03 Selects hoisting/lifting and moving equipment

B-7.04 Secures area

B-8 Rigs, hoists/lifts and moves load

B-8.01 Sets up rigging, hoisting/lifting and moving equipment

B-8.02 Performs hoist/lift and move

B-8.03 Maintains rigging, hoisting/lifting and moving equipment

Safety & Communication Techniques – Theory

13 hours

- identify Occupation Health and Safety (OH&S) Regulations
- interpret OH&S Regulations
- describe WHMIS 2015
- describe fire safety
- describe the importance of using effective verbal and non-verbal communication with people in the workplace

Safety & Communication Techniques – Shop

13 hours

- demonstrate knowledge of trade terminology
- demonstrate knowledge of effective communication practices

RSOS topics covered in this section of training:

A-1 Performs safety-related functions

A-1.01 Uses personal protective equipment (PPE) and safety equipment

A-1.02 Maintains safe worksite

A-1.03 Protects the environment

A-1.04 Performs lock-out/tag-out and zero-energy state procedures

A-2 Uses tools and equipment

A-2.03 Uses access equipment

A-4 Uses communication and mentoring techniques

A-4.01 Uses communication techniques

Technical Drawing

16 hours

- develop working sketches
- develop working drawings from sketches
- construct parts and assembly from working drawings

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.08 Uses mechanical drawings and schematics

Trade Mathematics

16 hours

- use basic Mathematics
- use basic Algebra
- perform trade calculations

This section of training exceeds the minimum sequencing as set out by the IMM RSOS.

Level Two

8 weeks

240 hours

Shafts, Keys, Seals, Bearing and Plain Bearings - Theory

26 hours

- describe types of seals
- describe shafting and attachments
- describe types of anti-friction bearings
- identify plain bearings

Shaft, Keys, Seals, Bearing and Plain Bearings – Shop

26 hours

- select bearings
- maintain bearings
- maintain seals
- select shafting and attachments

RSOS topics covered in this section of training:

C-10 Services shafts, bearings and seals

C-10.01 Installs shafts, bearings and seals

C-10.02 Diagnoses shafts, bearings and seals

C-10.03 Maintains shafts, bearings and seals

C-10.04 Repairs shafts, bearings and seals

Lubrication and Levelling – Theory

13 hours

- describe lubricant types and applications
- describe types of lubrication systems
- describe levels and levelling procedures
- describe optical levels

Lubrication and Levelling – Shop

13 hours

- select lubricants
- maintain lubrication systems
- lubricate equipment
- demonstrate levelling procedures

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.03 Lubricates systems and components

A-3.04 Performs leveling of components and systems

Arc Welding - Theory

26 hours

- describe the safe operation, setup and maintenance of GMAW and SMAW processes
- describe the different power sources, currents, polarities and electrodes utilized within GMAW and SMAW
- identify the different shielding gases and applications within GMAW

Arc Welding - Shop

26 hours

- Select the appropriate voltage and shielding gas, flow rate and type of transfer while performing GMAW
- Demonstrate the safe operation and maintenance when performing GMAW in multiple positions
- Select the appropriate amperage and electrode while performing SMAW

- Demonstrate the safe operation and maintenance when performing SMAW in multiple positions
- Demonstrate removal of an outer bearing race from a bore utilizing SMAW (weld shrinkage)

RSOS topics covered in this section of training:

A-1 Performs safety-related functions

A-1.01 Uses personal protective equipment (PPE) and safety equipment

A-1.04 Performs lock-out/tag-out and zero-energy state procedures

A-3 Performs routine trade tasks

A-3.02 Fabricates workpiece

A-3.06 Performs material identification

A-3.07 Performs heat treatment of metal

A-6 Performs cutting and welding operations

A-6.03 Welds material using shielded metal arc welding (SMAW) equipment

A-6.04 Welds material with gas metal arc welding (GMAW) equipment

A-6.05 Welds material with gas tungsten arc welding (GTAW) equipment

Belts and Chains - Theory

13 hours

- describe V-belt systems
- describe chain systems

Belts and Chains – Shop

13 hours

- assemble V-belt drives
- maintain V-belt drives
- assemble chain drives
- maintain chain drives

RSOS topics covered in this section of training:

C-12 Services chain and belt drive systems

C-12.01 Installs chain and belt drive systems

C-12.02 Diagnoses chain and belt drive systems

C-12.03 Maintains chain and belt drive systems

C-12.04 Repairs chain and belt drive systems

Gear Systems, Couplings, Clutches and Brakes - Theory

13 hours

- describe direct drive couplings, clutches and brakes
- describe gear drive systems

Gear Systems, Couplings, Clutches and Brakes – Shop

13 hours

- maintain couplings, clutches and brakes
- maintain gear drives

RSOS topics covered in this section of training:

C-11 Services couplings, clutches and brakes

- C-11.01 Installs couplings, clutches and brakes
- C-11.02 Diagnoses couplings, clutches and brakes
- C-11.03 Maintains couplings, clutches and brakes
- C-11.04 Repairs couplings, clutches and brakes

C-13 Services gear systems

- C-13.01 Installs gear systems
- C-13.02 Diagnoses gear systems
- C-13.03 Maintains gear systems
- C-13.04 Repairs gear systems

Rough Alignment and Dial Alignment – Theory

13 hours

- identify alignment procedures, tools and current technology
- identify rim and face method of shaft alignment

Rough Alignment and Dial Alignment – Shop

13 hours

- demonstrate feeler gauge alignment
- perform rim and face alignment

RSOS topics covered in this section of training:

C-14 Performs shaft alignment procedures

- C-14.01 Performs rough alignment
- C-14.02 Performs dial alignment

Trade Math

16 hours

- use basic algebra
- use metric units
- perform trade calculations

This section of training exceeds the minimum sequencing as set out by the IMM RSOS.

Technical Drawing

16 hours

- construct machine drawings
- interpret machine drawings
- interpret assembly drawings

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

- A-3.08 Uses mechanical drawings and schematics

Level Two topics from the RSOS that are taught in context:

A-1 Performs Safety-Related Functions

A-2 Uses Tools and Equipment

A-3 Performs Routine Trade Tasks

For details regarding the In Context Topic, see page 27.

Level Three	8 weeks	240 hours
Advanced Shaft Alignment - Theory		13 hours
• identify cross dialing method • identify laser method		
Advanced Shaft Alignment – Shop		13 hours
• apply cross dialing method • apply laser method		
RSOS topics covered in this section of training:		
A-3 Performs routine trade tasks		
A-3.04 Performs levelling of components and systems		
C-14 Performs shaft alignment procedures		
C-14.02 Performs dial alignment		
C-14.03 Performs laser alignment		
Pipe Fitting, Tanks and Containers - Theory		13 hours
• describe theory of piping, tank and container systems • identify piping system and components • identify tank and container systems and components		
Pipe Fitting, Tanks and Containers – Shop		13 hours
• construct piping systems		
RSOS topics covered in this section of training:		
A-3 Performs routine trade tasks		
A-3.02 Fabricates work piece		
D-19 Services process piping, tanks and containers		
D-19.01 Installs process tanks and containers		
D-19.02 Installs process piping		
D-19.03 Diagnoses process tanks and containers		
D-19.04 Diagnoses process piping		
D-19.05 Maintains process tanks and containers		
D-19.06 Maintains process piping		
D-19.07 Repairs process tanks and containers		
D-19.08 Repairs process piping		

Pneumatics, Compressors, Vacuum Systems, Fan and Blowers

26 hours

- describe pneumatic theory
- identify system components
- identify schematics
- identify pneumatics circuits
- identify troubleshooting techniques

Pneumatics, Compressors, Vacuum Systems, Fan and Blowers – Shop

26 hours

- construct pneumatic circuits
- test pneumatic circuits
- demonstrate troubleshooting techniques
- maintain pneumatic system components and actuators

RSOS topics covered in this section of training:

A-1 Performs safety-related functions

A-1.01 Uses personal protective equipment (PPE) and safety equipment

A-1.04 Performs lock-out/tag-out and zero-energy state procedures

D-16 Services Fans and Blowers

D-16.01 Installs fans and blowers

D-16.02 Diagnoses fans and blowers

D-16.03 Maintains fans and blowers

D-16.04 Repairs fans and blowers

D-18 Services Compressors

D-18.01 Installs compressors

D-18.02 Diagnoses compressors

D-18.03 Maintains compressors

D-18.04 Repairs Compressors

E-22 Services pneumatic and vacuum systems

E-22.01 Installs pneumatic and vacuum systems

E-22.02 Diagnoses pneumatic and vacuum systems

E-22.03 Maintains pneumatic and vacuum systems

E-22.04 Repairs pneumatic and vacuum systems

Pumps

26 hours

- describe pump theory and systems
- describe system components
- identify pump types
- identify pump components

Pumps – Shop

26 hours

- test pumps
- test pump circuits
- maintain pumps

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.03 Lubricates systems and components

D-17 Services Pumps

D-17.01 Installs pumps

D-17.02 Diagnoses pumps

D-17.03 Maintains pumps

D-17.04 Repairs pumps

Hydraulics – Theory

26 hours

- describe hydraulic theory
- identify system components
- describe fluid, conductors and fittings
- identify schematics
- identify hydraulic circuits
- identify troubleshooting techniques

Hydraulics

26 hours

- construct hydraulic circuits
- test hydraulic circuits
- demonstrate troubleshooting techniques

RSOS topics covered in this section of training:

E-21 Services Hydraulic systems

E-21.01 Installs hydraulic systems

E-21.02 Diagnoses hydraulic systems

E-21.03 Maintains hydraulic systems

E-21.04 Repairs hydraulic systems

Technical Drawing

16 hours

- construct fabrication drawings
- interpret fabrication drawings
- interpret piping drawings

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.08 Uses mechanical drawings and schematics

Trade Mathematics

16 hours

- use basic geometry and trigonometry
- perform trade calculations

This section of training exceeds the minimum sequencing as set out by the IMM RSOS.

Level Three topics from the RSOS that are taught in context:

A-1 Performs Safety-Related Functions

A-2 Uses Tools and Equipment

A-3 Performs Routine Trade Tasks

For details regarding the In Context Topic, see page 27.

Level Four

8 weeks

240 hours

Machine Installation – Theory

13 hours

- identify precision optical levels
- identify types of foundations and bases
- identify types of concrete forms and grouting
- identify types of machine installation hardware

Machine Installation – Shop

13 hours

- demonstrate field layout techniques

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.02 Fabricates workpiece

A-3.04 Performs leveling of components and systems

A-3.08 Uses mechanical drawings and schematics

C-9 Services prime movers

C-9.01 Installs prime movers

Material Handling – Theory

13 hours

- identify conveyor systems
- identify conveyor components

Material Handling – Shop

13 hours

- maintain conveyor systems

RSOS topics covered in this section of training:

D-20 Services conveying systems

D-20.01 Installs conveying systems

D-20.02 Diagnoses conveying systems

D-20.03 Maintains conveying systems

D-20.04 Repairs conveying systems

Robotics and Automated Equipment – Theory

13 hours

- define terminology associated with robotics and automated equipment
- describe safe work practices associated with robotics and automated equipment
- identify tools and equipment associated with robotics and automated equipment

Robotics and Automated Equipment – Shop

13 hours

- install robotics and automated equipment
- diagnose robotics and automated equipment
- maintain robotics and automated equipment
- repair robotics and automated equipment

RSOS topics covered in this section of training:

A-1 Performs safety-related functions

A-1.01 Uses personal protective equipment (PPE) and safety equipment

A-1.04 Performs lock-out/tag-out and zero-energy state procedures

D-15 Services robotics and automated equipment

D-15.01 Installs robotics and automated equipment

D-15.02 Diagnoses robotics and automated equipment

D-15.03 Maintains robotics and automated equipment

D-15.04 Repairs robotics and automated equipment

Mentoring Techniques, Commissioning & Decommissioning Equipment – Theory 13 hours

- identify strategies for learning skills in the workplace
- identify strategies for mentoring in the workplace
- define terminology associated with commissioning and decommissioning

Mentoring Techniques, Commissioning & Decommissioning Equipment – Shop 13 hours

- demonstrate knowledge of strategies for mentoring in the workplace
- demonstrate knowledge of the procedures used to commission systems and components
- demonstrate knowledge of procedures used to decommission systems and components
- demonstrate knowledge of safety practices related to commissioning and decommissioning

RSOS topics covered in this section of training:

A-4 Uses communication and mentoring techniques

A-4.02 Uses mentoring techniques

F-24 Commissions and decommissions equipment

F-24.01 Commissions systems and components

F-24.02 Decommissions systems and components

Steam/Prime/Preventative Maintenance 26 hours

- identify prime movers
- identify power generation systems
- identify preventative and predictive maintenance principles.
- describe preventative and predictive maintenance methods
- identify advanced torque methods of fasteners

Steam/Prime/Preventative Maintenance 26 hours

- perform preventative and predictive maintenance methods

RSOS topics covered in this section of training:

A-3 Performs routine trade tasks

A-3.03 Lubricates systems and components

C-9 Services prime movers

C-9.02 Diagnoses prime movers

C-9.03 Maintains prime movers

C-9.04 Repairs prime movers

F-23 Performs preventative and predictive maintenance

F-23.01 Performs preventative maintenance activities

F-23.02 Performs vibration analysis procedures

F-23.03 Performs balancing procedures

F-23.04 Performs non-destructive testing (NDT) procedures

F-23.05 Performs fluid analysis procedures

F-23.06 Performs predictive maintenance activities

Introduction to CAD**16 hours**

- demonstrate coordinate systems and menu operation
- construct basic geometric entities
- implement drawing management
- perform basic editing and drawing creation techniques
- design drawing documentation

RSOS topics covered in this section of training:**A-3 Performs routine trade tasks**

A-3.08 Uses mechanical drawings and schematics

Trade Mathematics**16 hours**

- use basic geometry and trigonometry
- perform trade calculations

This section of training exceeds the minimum sequencing as set out by the IMM RSOS.

Machine Tool - Theory**26 hours**

- describe lathe components and accessories
- describe milling machine components and accessories
- describe cutting tools

Machine Tool – Shop**26 hours**

- demonstrate lathe maintenance
- perform lathe operations
- demonstrate milling machine maintenance
- perform milling operations

This section of training exceeds the minimum sequencing as set out by the IMM RSOS.

Level Four topics from the RSOS that are taught in context:

A-1 Performs Safety-Related Functions

A-2 Uses Tools and Equipment

A-3 Routine Trade Tasks

For details regarding the In Context Topic, see page 27.

IN CONTEXT TOPICS

Some material may be taught ‘in context’. In context means learning that has already taken place and is being applied to the applicable task. Learning outcomes for in context topics are accomplished in other topics in that level.

A-1 Performs Safety-Related Functions

- A-1.01 Uses personal protective equipment (PPE) and safety equipment
- A-1.02 Maintains safe worksite
- A-1.03 Protects the environment
- A-1.04 Performs lock-out/tag-out and zero-energy state procedures

A-2 Uses Tools and Equipment

- A-2.01 Uses hand and portable power tools
- A-2.02 Uses shop machines
- A-2.03 Uses access equipment

A-3 Performs Routine Trade Tasks

- A-3.01 Plans work
- A-3.02 Fabricates workpiece
- A-3.03 Lubricates systems and components
- A-3.04 Performs leveling of components and systems
- A-3.05 Uses fastening and retaining devices
- A-3.06 Performs material identification
- A-3.07 Performs heat treatment of metal
- A-3.08 Uses mechanical drawings and schematics
