

Heavy Duty Equipment Technician

Guide to Course Content

Online: www.saskapprenticeship.ca

Recognition:

To promote transparency and consistency, portions of this document has been adapted from the 2023 Heavy Duty Equipment Technician Red Seal Occupational Standard (Employment and Social Development Canada).

A complete version of the Occupational Standard can be found at www.red-seal.ca

STRUCTURE OF THE **GUIDE TO COURSE** **CONTENT**

To facilitate understanding of the occupation, this guide to course content contains the following sections:

Task Matrix: a chart which outlines graphically the major work activities, tasks and sub-tasks of this standard detailing the essential skills and the level of training where the content is covered. The Task Matrix is broken down into the following:

Major Work Activity: the largest division within the standard that is comprised of a distinct set of trade activities.

Task: distinct actions that describe the activities within a major work activity.

Sub-task: distinct actions that describe the activities within a task.

Training Profile Chart: a chart which outlines the model for Saskatchewan Apprenticeship and Trade Certification Commission (SATCC) technical training.

Technical Training Course Content for the Heavy Duty Equipment Technician trade: a chart which outlines the model for SATCC technical training sequencing. For the harmonized level of training, a cross reference to the Harmonized apprenticeship technical training sequencing, at the learning outcome level, is provided.

TRAINING REQUIREMENTS FOR THE **HEAVY DUTY EQUIPMENT TECHNICIAN** TRADE

To graduate from each level of the apprenticeship program, an apprentice must successfully complete the required technical training and compile enough on-the-job experience to total at least 1800 hours each year. Total trade time required is 7200 hours and at least 4 years in the trade.

There are four levels of technical training delivered by Saskatchewan Polytechnic in Saskatoon.

Level One:	8 weeks
Level Two:	8 weeks
Level Three:	8 weeks
Level Four:	8 weeks

The information contained in this document details the technical training delivered for each level of apprenticeship. An apprentice spends approximately 15% of their apprenticeship term in a technical training institute learning the technical and theoretical aspects of the trade. The hours and percentages of technical and practical training may vary according to class needs and progress.

The content of the technical training components is subject to change without notice.

Entrance Requirements for Apprenticeship Training

Your grade twelve transcripts (with no modified classes) or GED 12 is your guarantee that you meet the educational entrance requirements for apprenticeship in Saskatchewan. In fact, employers prefer and recommend apprentices who have completed high school. This ensures the individual has all of the necessary skills required to successfully complete the apprenticeship program, and receive journeyperson certification.

Individuals with “modified” or “general” classes in math or science do not meet our entry requirements. These individuals are required to take an entrance assessment prescribed by the SATCC.

English is the language of instruction in all apprenticeship programs and is the common language for business in Saskatchewan. Before admission, all apprentices and/or “upgraders” must be able to understand and communicate in the English language.

Designated Trade Name	Math Credit at the Indicated Grade Level❶	Science Credit at Grade Level
Heavy Duty Equipment Technician	Grade 11	Grade 10
❶ - (One of the following) WA – Workplace and Apprenticeship; or F – Foundations; or P – Pre-calculus, or a Math at the indicated grade level (Modified and General Math credits are not acceptable.). *Applicants who have graduated in advance of 2015-2016, or who do not have access to the revised Science curricula will require a Science at the minimum grade level indicated by trade. For information about high school curriculum, including Math and Science course names, please see: http://www.curriculum.gov.sk.ca/ Individuals not meeting the entrance requirements will be subject to an assessment and any required training.		

HEAVY DUTY EQUIPMENT TECHNICIAN TASK MATRIX

This chart outlines the major work activities, tasks and sub-tasks from the 2023 Red Seal Occupational Standard. Each sub-task details the corresponding essential skill and level of training where the content is covered. *

* Sub-tasks with numbers in the boxes are where the content will be delivered in training.

A – Performs Common Occupational Skills

7%

A-1 Performs safety-related functions	1.01 Performs hazard analysis 1 (2, 3, 4 in context)	1.02 Maintains safe work environment 1 (2, 3, 4 in context)	1.03 Uses personal protective equipment (PPE) and safety equipment 1 (2, 3, 4 in context)	1.04 Implements safety protocols for hybrid and all-electric equipment and attachments 1 (2, 3, 4 in context)
	2.01 Uses hand, power, measuring, testing and diagnostic tools 1 (2, 3, 4 in context)	2.02 Uses shop equipment 1 (2, 3, 4 in context)	2.03 Uses access equipment 1 (2, 3, 4 in context)	2.04 Uses hoisting, rigging, lifting, cribbing and blocking equipment 1,2 (3, 4 in context)
	2.05 Uses welding equipment 1,2 (3, 4 in context)	2.06 Uses heating and cutting equipment 1 (2, 3, 4 in context)	2.07 Uses electronic service tools and systems for diagnostics and programming 1 (2, 3, 4 in context)	
	3.01 Uses documentation and reference materials 1 (2, 3, 4 in context)	3.02 Prepares job action plan 1 (2, 3, 4 in context)	3.03 Maintains fluids and lubricants 1 (2, 3, 4 in context)	3.04 Services hoses, tubing, piping and fittings 1 (2, 3, 4 in context)
A-2 Uses and maintains tools and equipment	3.05 Services bearings and seals 1 (2, 3, 4 in context)	3.06 Uses fasteners and sealing materials 1 (2, 3, 4 in context)	3.07 Services safety features 1 (2, 3, 4 in context)	3.08 Performs operational check-out 1 (2, 3, 4 in context)
A-3 Performs routine work practices				

A-4 Uses communication and mentoring techniques

1

4.01 Uses communication techniques

4.02 Uses mentoring techniques

4

B – Services, Diagnoses and Repairs Engines and Supporting Systems

15%

B-5 Services, diagnoses and repairs base engines

TECHNICAL TRAINING COURSE CONTENT

This chart outlines the model for Saskatchewan Apprenticeship and Trade Certification Commission (SATCC) technical training sequencing. For the harmonized level of training, a cross reference to the Red Seal Occupational Standard (RSOS) apprenticeship technical training sequencing, at the learning outcome level, is provided.

Sub-tasks listed are the minimum to be covered in a topic. Related sub-tasks not listed may be used as a reference and taught “in context” in other topics.

Level One	8 weeks	240 hours
Basic Tools – Theory		12 hours
- describe safety rules and regulations - describe the purpose and care of shop and hand tools - describe various types of fasteners, adhesives and sealing devices		
Basic Tools – Shop		12 hours
- demonstrate safety - explain legislative regulations - demonstrate use and care of hand tools and shop equipment		
RSOS topics covered in this section of training:		
A-1 Performs safety-related functions		
A-1.01 Performs hazard analysis		
A-1.02 Maintains safe work environment		
A-1.03 Uses personal protective equipment (PPE) and safety equipment		
A-2 Uses and maintains tools and equipment		
A-2.01 Uses hand, power, measuring, testing and diagnostic tools		
A-2.02 Uses shop equipment		
A-2.04 Uses hoisting, rigging, lifting, cribbing and blocking equipment		
A-2.05 Uses welding equipment		
A-2.06 Uses heating and cutting equipment		
A-3 Performs routine work practices		
A-3.01 Uses documentation and reference materials		
A-3.04 Services hoses, tubing, piping and fittings		
A-3.06 Uses fasteners and sealing materials		
A-4 Uses communication and mentoring techniques		
A-4.01 Uses communication techniques		
Brake Systems – Theory		24 hours
- describe hydraulic brake system operation - describe air brake system operation - describe various types of park brake systems		
Brake Systems – Shop		36 hours
- evaluate hydraulic brake system operation - evaluate air brake system operation		

- evaluate various park brake systems
- conduct final adjustments and performance tests
- repair faults

RSOS topics covered in this section of training:

C-15 Services, diagnoses and repairs brake systems

- C-15.01 Services brake systems
- C-15.02 Diagnoses brake systems
- C-15.03 Repairs brake systems

G-36 Services, diagnoses and repairs pneumatic systems

- G-36.01 Services pneumatic systems
- G-36.02 Diagnoses pneumatic systems
- G-36.03 Repairs pneumatic systems

Electrical – Theory

14 hours

- apply scientific principles to explain electrical theory and magnetism
- identify electrical circuit types and faults utilizing test equipment
- explain the function and operation of a lead acid battery

Electrical – Shop

16 hours

- measure electrical values and check circuit operation
- evaluate a lead acid battery
- repair faults

RSOS topics covered in this section of training:

A-2 Uses and maintains tools and equipment

- A-2.07 Uses electronic service tools and systems for diagnostics and programming

D-18 Services, diagnoses and repairs charging systems

- D-18.01 Services charging systems
- D-18.02 Diagnoses charging systems
- D-18.03 Repairs charging systems

D-19 Services, diagnoses and repairs starting systems

- D-19.01 Services starting systems
- D-19.02 Diagnoses starting systems
- D-19.03 Repairs starting systems

D-20 Services, diagnoses and repairs battery systems

- D-20.01 Services battery systems
- D-20.02 Diagnoses battery systems
- D-20.03 Repairs battery systems

D-21 Services, diagnoses and repairs electrical components

- D-21.01 Services electrical components
- D-21.02 Diagnoses electrical components
- D-21.03 Repairs electrical components

Environmental Control Systems – Theory

6 hours

- complete the Heating, Refrigeration and Air Conditioning Institute's course on ozone depleting substances

RSOS topics covered in this section of training:

F-31 Services, diagnoses and repairs ventilation and filtration systems

- F-31.01 Services ventilation and filtration systems
- F-31.02 Diagnoses ventilation and filtration systems
- F-31.03 Repairs ventilation and filtration systems

F-32 Services, diagnoses and repairs air conditioning systems

- F-32.01 Services air conditioning systems
- F-32.02 Diagnoses air conditioning systems
- F-32.03 Repairs air conditioning systems

Hydraulics – Theory

24 hours

- explain the fundamentals of a basic hydraulic system and related components
- interpret hydraulic symbols and diagrams
- describe hydraulic system maintenance and testing procedures
- describe open and closed center hydraulic systems

Hydraulics – Shop

36 hours

- service hydraulic system and various components
- test hydraulic systems using correct tools and procedures

RSOS topics covered in this section of training:

F-33 Services, diagnoses and repairs sound suppression systems

- F-33.01 Services sound suppression systems
- F-33.02 Diagnoses sound suppression systems
- F-33.03 Repairs sound suppression systems

G-34 Services, diagnoses and repairs hydraulic systems

- G-34.01 Services hydraulic systems
- G-34.02 Diagnoses hydraulic systems
- G-34.03 Repairs hydraulic systems

G-35 Services, diagnoses and repairs hydrostatic systems

- G-35.01 Services hydrostatic systems
- G-35.02 Diagnoses hydrostatic systems
- G-35.03 Repairs hydrostatic systems

Steering Systems – Theory

12 hours

- explain basic wheel and frame alignment angles
- explain manual and integral steering system operation
- describe mounting procedures for tires, rims and hubs

Steering Systems – Shop

18 hours

- perform a basic wheel alignment
- evaluate manual and integral power steering systems
- perform mounting procedures for tires, rims and hubs
- repair system faults

RSOS topics covered in this section of training:

A-3 Performs routine work practices

- A-3.02 Prepares job action plan
- A-3.05 Services bearings and seals
- A-3.08 Performs operational check-out

C-13 Services, diagnoses and repairs steering systems

C-13.01 Services steering systems

C-13.02 Diagnoses steering systems

C-13.03 Repairs steering systems

C-14 Services, diagnoses and repairs suspension systems

C-14.01 Services suspension systems

C-14.02 Diagnoses suspension systems

C-14.03 Repairs suspension systems

C-17 Services, diagnoses and repairs wheel assemblies

C-17.01 Services wheel assemblies

C-17.02 Diagnoses wheel assemblies

C-17.03 Repairs wheel assemblies

G-36 Services, diagnoses and repairs pneumatic systems

G-36.01 Services pneumatic systems

G-36.02 Diagnoses pneumatic systems

G-36.03 Repairs pneumatic systems

Structural Components and Accessories – Theory**12 hours**

- identify hoisting and rigging techniques
- describe the purpose of roll over protection system (ROPS) and operator safety systems
- describe preventative maintenance procedures
- identify hybrid and EV systems and safe work procedures

Structural Components and Accessories – Shop**18 hours**

- perform hoisting and rigging techniques
- evaluate roll over protection system (ROPS) and operator safety systems
- perform preventative maintenance procedures
- perform hybrid and EV system lockout or safe energy release
- repairs defects

RSOS topics covered in this section of training:**A-1 Performs safety-related functions**

A-1.04 Implements safety protocols for hybrid and all electric equipment and attachments

A-2 Uses and maintains tools and equipment

A-2.01 Uses hand, power, measuring, testing and diagnostic tools

A-2.02 Uses shop equipment

A-2.03 Uses access equipment

A-2.04 Uses hoisting, rigging, lifting, cribbing and blocking equipment

A-2.05 Uses welding equipment

A-2.06 Uses heating and cutting equipment

A-3 Performs routine work practices

A-3.03 Maintains fluids and lubricants

A-3.07 Services safety features

B-6 Services, diagnoses and repairs lubrication systems

B-6.01 Services lubrication systems

B-6.02 Diagnoses lubrication systems

B-6.03 Repairs lubrication systems

C-14 Services, diagnoses and repairs suspension systems

- C-14.01 Services suspension systems
- C-14.02 Diagnoses suspension systems
- C-14.03 Repairs suspension systems

C-16 Services, diagnoses and repairs undercarriage systems

- C-16.01 Services undercarriage systems
- C-16.02 Diagnoses undercarriage systems
- C-16.03 Repairs undercarriage systems

F-30 Services, diagnoses and repairs heating systems

- F-30.01 Services heating systems
- F-30.02 Diagnoses heating systems
- F-30.03 Repairs heating systems

F-31 Services, diagnoses and repairs ventilation and filtration systems

- F-31.01 Services ventilation and filtration systems
- F-31.02 Diagnoses ventilation and filtration systems
- F-31.03 Repairs ventilation and filtration systems

H-37 Services, diagnoses and repairs structural components

- H-37.01 Services structural components

H-38 Services, diagnoses and repairs operator station components

- H-38.01 Services operator station components
- H-38.02 Diagnoses operator station components
- H-38.03 Repairs operator station components

I-40 Services, diagnoses and repairs hybrid equipment

- I-40.01 Services hybrid equipment
- I-40.02 Diagnoses hybrid equipment
- I-40.03 Repairs hybrid equipment

I-41 Services, diagnoses and repairs all-electric equipment

- I-41.01 Services all-electric equipment
- I-41.02 Diagnoses all-electric equipment
- I-41.03 Repairs all-electric equipment

Level Two

8 weeks

240 hours

Brake Systems ABS – Theory

12 hours

- describe antilock braking system components
- describe electric braking system components
- describe traction and stability control system components
- describe multidisc braking systems

Brake Systems ABS – Shop

18 hours

- evaluate antilock braking systems
- evaluate an electric braking system
- evaluate traction and stability control systems
- repair system faults
- evaluate multidisc braking systems

RSOS topics covered in this section of training:

B-9 Services, diagnoses and repairs engine management systems

B-9.01 Services engine management systems

B-9.02 Diagnoses engine management systems

B-9.03 Repairs engine management systems

C-15 Services, diagnoses and repairs brake systems

C-15.01 Services brake systems

C-15.02 Diagnoses brake systems

C-15.03 Repairs brake systems

D-21 Services, diagnoses and repairs electrical components

D-21.01 Services electrical components

D-21.02 Diagnoses electrical components

D-21.03 Repairs electrical components

D-22 Services, diagnoses and repairs equipment management systems and electronic components

D-22.01 Services equipment management systems and electronic components

D-22.02 Diagnoses equipment management systems and electronic components

D-22.03 Repairs equipment management systems and electronic components

Drivetrain Systems – Theory

24 hours

- identify various seals and bearing types
- discuss various clutch types
- discuss manual transmission operation
- discuss differential operation
- discuss planetary and final drives
- discuss driveline operation

Drivetrain Systems – Shop

36 hours

- perform the removal and replacement of various seals and bearings
- evaluate various clutch types
- evaluate manual transmission operation
- evaluate differential operation
- evaluate planetary and final drive systems
- evaluate driveline systems
- repair faults

RSOS topics covered in this section of training:

E-23 Services, diagnoses and repairs clutches

E-23.01 Services clutches

E-23.02 Diagnoses clutches

E-23.03 Repairs clutches

E-25 Services, diagnoses and repairs manual transmissions and transfer cases

E-25.01 Services manual transmissions and transfer cases

E-25.02 Diagnoses manual transmissions and transfer cases

E-25.03 Repairs manual transmissions and transfer cases

E-27 Services, diagnoses and repairs driveline systems

E-27.01 Services driveline systems

E-27.02 Diagnoses driveline systems

E-27.03 Repairs driveline systems

E-28 Services, diagnoses and repairs drive axles and differentials

E-28.01 Services drive axles and differentials

E-28.02 Diagnoses drive axles and differentials

E-28.03 Repairs drive axles and differentials

Electrical – Theory

12 hours

- explain the operation of a cranking system and related components
- explain the operation of an alternating current (AC) charging system and related components

Electrical – Shop

18 hours

- evaluate cranking and charging systems
- repair faults

RSOS topics covered in this section of training:

D-18 Services, diagnoses and repairs charging systems

D-18.01 Services charging systems

D-18.02 Diagnoses charging systems

D-18.03 Repairs charging systems

D-19 Services, diagnoses and repairs starting systems

D-19.01 Services starting systems

D-19.02 Diagnoses starting systems

D-19.03 Repairs starting systems

D-21 Services, diagnoses and repairs electrical components

D-21.01 Services electrical components

D-21.02 Diagnoses electrical components

D-21.03 Repairs electrical components

Hydraulics – Theory

30 hours

- describe the operation of the different types of flow control valves
- discuss pilot control and orbital steering systems
- describe open and closed loop hydrostatic systems
- describe the operation of a load sensing hydraulic system

Hydraulics – Shop

30 hours

- evaluate various types of hydraulic systems and flow control valves
- evaluate pilot control and orbital steering systems
- evaluate open and closed loop hydrostatic systems
- evaluate a load sensing hydraulic system
- repair faults

RSOS topics covered in this section of training:

E-24 Services, diagnoses and repairs torque converters, fluid couplers and hydraulic retarders

E-24.01 Services torque converters, fluid couplers and hydraulic retarders

E-24.02 Diagnoses torque converters, fluid couplers and hydraulic retarders

E-24.03 Repairs torque converters, fluid couplers and hydraulic retarders

G-34 Services, diagnoses and repairs hydraulic systems

G-34.01 Services hydraulic systems

G-34.02 Diagnoses hydraulic systems

G-34.03 Repairs hydraulic systems

G-35 Services, diagnoses and repairs hydrostatic systems

G-35.01 Services hydrostatic systems

G-35.02 Diagnoses hydrostatic systems

G-35.03 Repairs hydrostatic systems

G-36 Services, diagnoses and repairs pneumatic systems

G-36.01 Services pneumatic systems

G-36.02 Diagnoses pneumatic systems

G-36.03 Repairs pneumatic systems

OFC/SMAW/GMAW Welding – Theory

6 Hours

- identify safety considerations associated with oxy-fuel units, shielded metal arc welding and gas metal arc welding
- describe the setup and operation of an oxy-fuel unit, shielded metal arc welding and gas metal arc welding equipment

OFC/SMAW/GMAW Welding – Shop

24 Hours

- cut plate and gauge metal using oxy-fuel unit
- weld ¼" material, T-joint, horizontal fillet and surface build up using the SMAW process

RSOS topics covered in this section of training:

A-2 Uses and maintains tools and equipment

A-2.05 Uses welding equipment

H-37 Services, diagnoses and repairs structural components

H-37.01 Services structural components

H-37.02 Diagnoses structural components

H-37.03 Performs mechanical repairs on structural components

Structural Components – Theory

12 Hours

- review hoisting and rigging techniques
- describe undercarriage operation and troubleshooting
- identify undercarriage components and crawler tractor final drive systems
- explain clutch brake and differential directional control in a crawler tractor

Structural Components – Shop

18 Hours

- perform hoisting and rigging techniques
- evaluate undercarriage and final drive components
- evaluate clutch brake and differential directional control in a crawler tractor
- repair faults

RSOS topics covered in this section of training:

A-2 Uses and maintains tools and equipment

A-2.04 Uses hoisting, rigging, lifting, cribbing and blocking equipment

C-13 Services, diagnoses and repairs steering systems

C-13.01 Services steering systems

C-13.02 Diagnoses steering systems

C-13.03 Repairs steering systems

C-16 Services, diagnoses and repairs undercarriage systems

C-16.01 Services undercarriage systems

C-16.02 Diagnoses undercarriage systems

C-16.03 Repairs undercarriage systems

E-23 Services, diagnoses and repairs clutches

E-23.01 Services clutches

E-23.02 Diagnoses clutches

E-23.03 Repairs clutches

E-29 Services, diagnoses and repairs final drive systems

E-29.01 Services final drive systems

E-29.02 Diagnoses final drive systems

E-29.03 Repairs final drive systems

H-37 Services, diagnoses and repairs structural components

H-37.01 Services structural components

H-37.02 Diagnoses structural components

H-37.03 Performs mechanical repairs on structural components

Level Two topics that are taught in context:

A-1 Performs Safety-Related Functions

A-2 Uses and Maintains Tools and Equipment

A-3 Routine Work Practices

H-38 Services, Diagnoses and Repairs Operator Station Components

For details regarding the In Context Topic, see page 29

Level Three

8 weeks

240 hours

Alternative Fuels – Theory

12 hours

- describe the ignition process of a spark ignition engine
- describe the fuel delivery process for various fuel types

Alternative Fuels – Shop

18 hours

- perform servicing, diagnoses and replacement of spark ignition component
- perform servicing, diagnosing and replacement of components related to fuel delivery

RSOS topics covered in this section of training:

B-9 Services, diagnoses and repairs engine management systems

B-9.01 Services engine management systems

B-9.02 Diagnoses engine management systems

B-9.03 Repairs engine management systems

B-10 Services, diagnoses and repairs fuel delivery systems

B-10.01 Services fuel delivery systems

B-10.02 Diagnoses fuel delivery systems

B-10.03 Repairs fuel delivery systems

D-18 Services, diagnoses and repairs charging systems

D-18.01 Services charging systems

D-18.02 Diagnoses charging systems

D-18.03 Repairs charging systems

D-19 Services, diagnoses and repairs starting systems

D-19.01 Services starting systems

D-19.02 Diagnoses starting systems

D-19.03 Repairs starting systems

Electrical – Theory

14 hours

- explain common electrical components and their applications
- interpret wiring diagrams
- explain common electrical faults

Electrical – Shop

16 hours

- measure electrical values
- construct electrical circuits
- analyze circuit operation

RSOS topics covered in this section of training:

B-9 Services, diagnoses and repairs engine management systems

B-9.01 Services engine management systems

B-9.02 Diagnoses engine management systems

B-9.03 Repairs engine management systems

D-22 Services, diagnoses and repairs equipment management systems and electronic components

D-22.01 Services equipment management systems and electronic components

D-22.02 Diagnoses equipment management systems and electronic components

D-22.03 Repairs equipment management systems and electronic components

Engine and Engine Support Systems – Theory

55 hours

- describe the operational characteristics of a diesel engine
- describe metallurgy and fluid analysis as it pertains to diesel engines
- describe the operational characteristics of various diesel engine support systems
- describe the procedures involved in a diesel engine overhaul
- describe the processes involved in determining component serviceability
- describe diesel engine failure diagnosis

Engine and Engine Support Systems – Shop

65 hours

- evaluate a diesel engine for potential faults prior to disassembly
- disassemble engine using correct procedures and shop practices
- evaluate engine components for serviceability
- assemble a diesel engine using proper procedures and serviceable components
- evaluate engines after assembly and inspect for potential faults
- evaluate operating engine for faults
- repair defects

RSOS topics covered in this section of training:

B-5 Services, diagnoses and repairs base engines

B-5.01 Services base engines

B-5.02 Diagnoses base engines

B-5.03 Repairs base engines

B-6 Services, diagnoses and repairs lubrication systems

B-6.01 Services lubrication systems

B-6.02 Diagnoses lubrication systems

B-6.03 Repairs lubrication systems

B-7 Services, diagnoses and repairs intake systems

B-7.01 Services intake systems

B-7.02 Diagnoses intake systems

B-7.03 Repairs intake systems

B-8 Services, diagnoses and repairs exhaust systems

B-8.01 Services exhaust systems

B-8.02 Diagnoses exhaust systems

B-8.03 Repairs exhaust systems

B-10 Services, diagnoses and repairs fuel delivery systems

B-10.01 Services fuel delivery systems

B-10.02 Diagnoses fuel delivery systems

B-10.03 Repairs fuel delivery systems

B-11 Services, diagnoses and repairs emission control systems

B-11.01 Services emission control systems

B-11.02 Diagnoses emission control systems

B-11.03 Repairs emission control systems

B-12 Services, diagnoses and repairs cooling systems

B-12.01 Services cooling systems

B-12.02 Diagnoses cooling systems

B-12.03 Repairs cooling systems

Powershift Transmissions – Theory

26 hours

- describe operation of fluid couplers and torque convertors
- describe various transmission hydraulic circuits
- describe the operation of various types of powershift and automatic transmissions
- describe the operation of transfer cases
- describe the operation of hydraulic retarders

Powershift Transmissions – Shop

34 hours

- evaluate torque convertors
- utilize hydraulic schematics
- evaluate powershift and automatic transmissions
- evaluate transfer cases
- evaluate hydraulic retarders
- repair faults

RSOS topics covered in this section of training:

D-22 Services, diagnoses and repairs equipment management systems and electronic components

D-22.01 Services equipment management systems and electronic components

D-22.02 Diagnoses equipment management systems and electronic components

D-22.03 Repairs equipment management systems and electronic components

E-23 Services, diagnoses and repairs clutches

E-23.01 Services clutches

E-23.02 Diagnoses clutches

E-23.03 Repairs clutches

E-24 Services, diagnoses and repairs torque converters, fluid couplers and hydraulic retarders

E-24.01 Services torque converters, fluid couplers and hydraulic retarders

E-24.02 Diagnoses torque converters, fluid couplers and hydraulic retarders

E-24.03 Repairs torque converters, fluid couplers and hydraulic retarders

E-25 Services, diagnoses and repairs manual transmissions and transfer cases

E-25.01 Services manual transmissions and transfer cases

E-25.02 Diagnoses manual transmissions and transfer cases

E-25.03 Repairs manual transmissions and transfer cases

E-26 Services, diagnoses and repairs automatic and powershift transmissions

E-26.01 Services automatic and powershift transmissions

E-26.02 Diagnoses automatic and powershift transmissions

E-26.03 Repairs automatic and powershift transmissions

Level Three topics that are taught in context:

A-1 Performs Safety-Related Functions

A-2 Uses and Maintains Tools and Equipment

A-3 Routine Work Practices

H-38 Services, Diagnoses and Repairs Operator Station Components

H-39 Services, Diagnoses and Repairs Attachments and Accessories

For details regarding the In Context Topic, see page 29

Level Four

8 weeks

240 hours

Drivetrains – Theory

24 hours

- explain the fundamentals of hybrid and EV drive systems
- describe the operation and components of a hybrid drive system
- describe the operation and components of an EV drive system
- identify tools and equipment for safe testing of hybrid and EV drive systems
- describe procedures to safely test and diagnose hybrid and EV drive systems

Drivetrains – Shop

36 hours

- evaluate hybrid drive systems
- examine hybrid drive system components
- examine EV drive system components
- evaluate hybrid and EV drive systems
- demonstrate repairs of hybrid and EV drive systems

RSOS topics covered in this section of training:

D-22 Services, diagnoses and repairs equipment management systems and electronic components

D-22.01 Services equipment management systems and electronic components

D-22.02 Diagnoses equipment management systems and electronic components

D-22.03 Repairs equipment management systems and electronic components

E-26 Services, diagnoses and repairs automatic and powershift transmissions

E-26.02 Diagnoses automatic and powershift transmissions

E-26.03 Repairs automatic and powershift transmissions

E-27 Services, diagnoses and repairs driveline systems

E-27.02 Diagnoses driveline systems

E-27.03 Repairs driveline systems

E-29 Services, diagnoses and repairs final drive systems

E-29.02 Diagnoses final drive systems

E-29.03 Repairs final drive systems

I-40 Services, diagnoses and repairs hybrid equipment

I-40.01 Services hybrid equipment

I-40.02 Diagnoses hybrid equipment

I-40.03 Repairs hybrid equipment

I-41 Services, diagnoses and repairs all-electric equipment

I-41.01 Services all-electric equipment

I-41.02 Diagnoses all-electric equipment

I-41.03 Repairs all-electric equipment

Electrical – Theory

28 hours

- demonstrate the theory, function and operation of electrical circuits and wiring diagrams
- compare common electrical and electronic components and their applications
- analyze the operation of electrical accessories and control circuits
- examine vehicle management systems, their components, characteristics, application and operation
- analyze the procedures involved diagnosing electronic vehicle management systems

Electrical – Shop

32 hours

- utilize wiring diagrams for fault diagnosis of electrical and electronic circuits
- evaluate electrical and electronic vehicle management systems
- select diagnostic equipment to evaluate vehicle management systems

RSOS topics covered in this section of training:

D-21 Services, diagnoses and repairs electrical components

D-21.01 Services electrical components

D-21.02 Diagnoses electrical components

D-21.03 Repairs electrical components

D-22 Services, diagnoses and repairs equipment management systems and electronic components

D-22.01 Services equipment management systems and electronic components

D-22.02 Diagnoses equipment management systems and electronic components

D-22.03 Repairs equipment management systems and electronic components

I-41 Services, diagnoses and repairs all-electric equipment

I-41.01 Services all-electric equipment

I-41.02 Diagnoses all-electric equipment

I-41.03 Repairs all-electric equipment

Environmental Control Systems – Theory

12 hours

- describe the operation of heating, ventilation and air conditioning systems
- identify various heating and air conditioning components
- describe proper usage of test equipment

Environmental Control Systems – Shop

18 hours

- demonstrate service procedures
- repair air conditioning and heating components
- repair air conditioning systems

RSOS topics covered in this section of training:

F-30 Services, diagnoses and repairs heating systems

F-30.01 Services heating systems

F-30.02 Diagnoses heating systems

F-30.03 Repairs heating systems

F-31 Services, diagnoses and repairs ventilation and filtration systems

F-31.01 Services ventilation and filtration systems

F-31.02 Diagnoses ventilation and filtration systems

F-31.03 Repairs ventilation and filtration systems

F-32 Services, diagnoses and repairs air conditioning systems

F-32.01 Services air conditioning systems

F-32.02 Diagnoses air conditioning systems

F-32.03 Repairs air conditioning systems

G-36 Services, diagnoses and repairs pneumatic systems

G-36.01 Services pneumatic systems

G-36.02 Diagnoses pneumatic systems

G-36.03 Repairs pneumatic systems

Fuel Systems – Theory

40 hours

- describe preventive maintenance procedures for diesel fuel storage and delivery systems
- describe proper procedures to diagnose faults in fuel delivery and control systems
- describe proper procedures to inspect, adjust or repair fuel delivery and control systems
- describe the procedures involved in performance testing on diesel engines
- describe proper procedures to inspect, adjust or repair exhaust after-treatment devices

Fuel Systems – Shop

50 hours

- perform preventative maintenance
- evaluate diesel injection delivery and control components
- evaluate an operating diesel engine
- evaluate exhaust after-treatment devices
- conduct performance testing
- repair faults

RSOS topics covered in this section of training:

A-4 Uses communication and mentoring techniques

A-4.02 Uses mentoring techniques

B-5 Services, diagnoses and repairs base engines

B-5.01 Services base engines

B-5.02 Diagnoses base engines

B-5.03 Repairs base engines

B-6 Services, diagnoses and repairs lubrication systems

B-6.01 Services lubrication systems

B-6.02 Diagnoses lubrication systems

B-6.03 Repairs lubrication systems

B-7 Services, diagnoses and repairs intake systems

B-7.01 Services intake systems

B-7.02 Diagnoses intake systems

B-7.03 Repairs intake systems

B-8 Services, diagnoses and repairs exhaust systems

B-8.01 Services exhaust systems

B-8.02 Diagnoses exhaust systems

B-8.03 Repairs exhaust systems

B-9 Services, diagnoses and repairs engine management systems

B-9.01 Services engine management systems

B-9.02 Diagnoses engine management systems

B-9.03 Repairs engine management systems

B-10 Services, diagnoses and repairs fuel delivery systems

B-10.01 Services fuel delivery systems

B-10.02 Diagnoses fuel delivery systems

B-10.03 Repairs fuel delivery systems

B-11 Services, diagnoses and repairs emission control systems

B-11.01 Services emission control systems

B-11.02 Diagnoses emission control systems

B-11.03 Repairs emission control systems

B-12 Services, diagnoses and repairs cooling systems

B-12.01 Services cooling systems

B-12.02 Diagnoses cooling systems

B-12.03 Repairs cooling systems

D-22 Services, diagnoses and repairs equipment management systems and electronic components

D-22.02 Diagnoses equipment management systems and electronic components

E-28 Services, diagnoses and repairs drive axles and differentials

E-28.02 Diagnoses drive axles and differentials

E-28.03 Repairs drive axles and differentials

Level Four topics that are taught in context:

A-1 Performs Safety-Related Functions

A-2 Uses and Maintains Tools and Equipment

A-3 Routine Work Practices

H-38 Services, Diagnoses and Repairs Operator Station Components

H-39 Services, Diagnoses and Repairs Attachments and Accessories

For details regarding the In Context Topic, see page 29

IN CONTEXT TOPICS

Some material may be taught ‘in context.’ In context means learning that has already taken place and is being applied to the applicable task. Learning outcomes for in context topics are accomplished in other topics in that level.

A-1 Performs safety-related functions

A-1.01 Performs hazard analysis

A-1.02 Maintains safe work environment

A-1.03 Uses personal protective equipment (PPE) and safety equipment

A-1.04 Implements safety protocols for hybrid and all electric equipment and attachments

A-2 Uses and maintains tools and equipment

A-2.01 Uses hand, power, measuring, testing and diagnostic tools

A-2.02 Uses shop equipment

A-2.03 Uses access equipment

A-2.04 Uses hoisting, rigging, lifting, cribbing and blocking equipment

A-2.05 Uses welding equipment

A-2.06 Uses heating and cutting equipment

A-2.07 Uses electronic service tools and systems for diagnostics and programming

A-3 Routine work practices

A-3.01 Uses documentation and reference materials

A-3.02 Prepares job action plan

A-3.03 Maintains fluids and lubricants

A-3.04 Services hoses, tubing, piping and fittings

A-3.05 Services bearings and seals

A-3.06 Uses fasteners and sealing materials

A-3.07 Services safety features

A-3.08 Performs operational check-out

H-38 Services, diagnoses and repairs operator station components

H-38.01 Services operator station components

H-38.02 Diagnoses operator station components

H-38.03 Repairs operator station components

H-39 Services, diagnoses and repairs attachments and accessories

H-39.01 Services attachments and accessories

H-39.02 Diagnoses attachments and accessories

H-39.03 Repairs attachments and accessories

H-39.04 Installs attachments and accessories
